

**ULTIMATE
PROTECTION FOR
REEL APPLICATIONS**

NEW REELX® GREASE

From Corrosion Technologies – the worldwide leader in marine corrosion prevention and lubrication.

REELX® GREASE is the new, hi-tech, synthetic, extreme-pressure optimized reel grease developed for all spinning and casting reels. Used in conjunction with **REELX®** fishing reel oil, ReelX Grease blocks moisture intrusion, reduces wear, disrupts existing corrosion and prevents new corrosion or rust from forming. ReelX Grease combines our top rated marine grease with an additive package containing the same revolutionary Polar Bonding technology found in **CORROSIONX®** and additional extreme pressure additives to make your fishing reels achieve their ultimate performance.

Bring your reel performance to a whole new level

- Improves reel performance
- Superior, marine grade water stability
- Prevents moisture intrusion
- Stops/prevents rust and corrosion
- Will Not Harm Plastic, PTFE or monofilament

Ultimate protection for reel applications where grease is the preferred lubricant
